# **1.0 Introduction**

## **1.1 Purpose**

The aim of the document is to gather and analyse and give an in-depth insight of the complete Student Gymkhana System of IIITDM Jabalpur. It will define the users and functionality of the Software.

Also, we shall predict and sort out how we hope this product will be used in order to gain a better understanding of the Software, outline concepts that may be developed later, and document ideas that are being considered, but may be discarded as the product develops. This document describes the project's target audience and its user interface, hardware and software requirements. It defines how our client, team and audience see the product and its functionality. Nonetheless, it helps any designer and developer to assist in Software Development Lifecycle (SDLC) processes.

## **1.2 Scope of Project**

The Software System will be Gymkhana Online Web Services Portal to make various events and activities of Gymkhana easier with various tools. Accessing the information and performing certain activities will be easy using the Software. Software will facilitate various Gymkhana Activities and Administration.

## **1.3 Document Convention**

When writing this SRS for Student Gymkhana Software, the following terminologies are used:

- Web server (WS): Web Server over which all the data and information is stored.
- Database: Database is collection of data of the Institute's various departments. Access will be given on proper authentication.
- Client: The user of the Software.

## **1.4 Intended Audience and Reading Suggestions**

Intended Audience of the SRS are students (IIITDM Jabalpur as well as outside) and developers, faculties and Staff. It specifically addresses issues of Gymkhana System.

## **1.5 References**

IEEE. IEEE Standard 830-1998 IEEE Recommended Practice for Software Requirements Specifications. IEEE Computer Society, 1998.

## **2.0 Overall Description**

### **2.1 Product Perspective**

Student Gymkhana System is itself a subsystem of College System. Software will take input from College Database of Students and Faculty.

There are specifically 7 Actors in the System, Election Controller, Convenor, Dean Students (Head of Gymkhana), Convenor-Technical Council, Convenor-Sports Council, Convenor- Cultural Council and students. Different Activities are performed by different actors.

### **2.2 Product Functions (Functional Requirements)**

Student Gymkhana will provide a number a functions:

- ⇒ Allow the Election Controller to hold elections and hence Form Senate.  
Each student will be able to vote using the portal.  
The result of elections will also be released online.  
Senate will constituted after results.
- ⇒ Software will ask for Nominations for the Senate Elections and Committee Formation.  
Students can nominate their representative online.
- ⇒ Student Committees, Council and Core Team for Fest can also be formed  
Committee will be constituted after approval from the Senate.  
Nominations will be filled prior the submission of candidature.
- ⇒ Formation of New Club  
Requirements and Need for new Club is recorded.  
New Club is made after discussion in Senate.
- ⇒ Creation of Activity Calendar of all Clubs.  
Year round activities of various clubs in the institute is created.
- ⇒ Submission of Event Report  
Report of events conducted by each club is also submitted.  
This is submitted along with the expenses of the event.
- ⇒ Issue of Notice/Notification  
Notice can be issued by Dean Student.

## 2.2.1 Appendix A: Glossary

**Gymkhana Office Bearer:** All the members associated with the Student Gymkhana. All the committee Members, Club Coordinators and Counsel Members.

**Student Senate:** These are elected student Representatives from each batch. They form Student Senate.

**Convenor:** The Student Head of Student Senate is called Convenor.

**Dean Student:** Student Gymkhana and all Activities under it are headed by Dean Student.

**Student:** All the students enrolled in the College.

**Cultural Council Convenor:** The head of Cultural Council.

**Technical Council Convenor:** The Head of Technical Council.

**Sports Council Convenor:** The Head of Sports Council.

## 2.3 User Classes and Characteristics

The typical Student Gymkhana user is simply anyone that has access to the Internet and a web browser. It is assumed that the user is familiar enough with a computer to operate the browser, keyboard and mouse and is capable of browsing to, from and within simple websites and literate enough to do basic operations.

## 2.4 Operating Environment

Operating Environment of the System will be basic Computer with Network Connectivity.

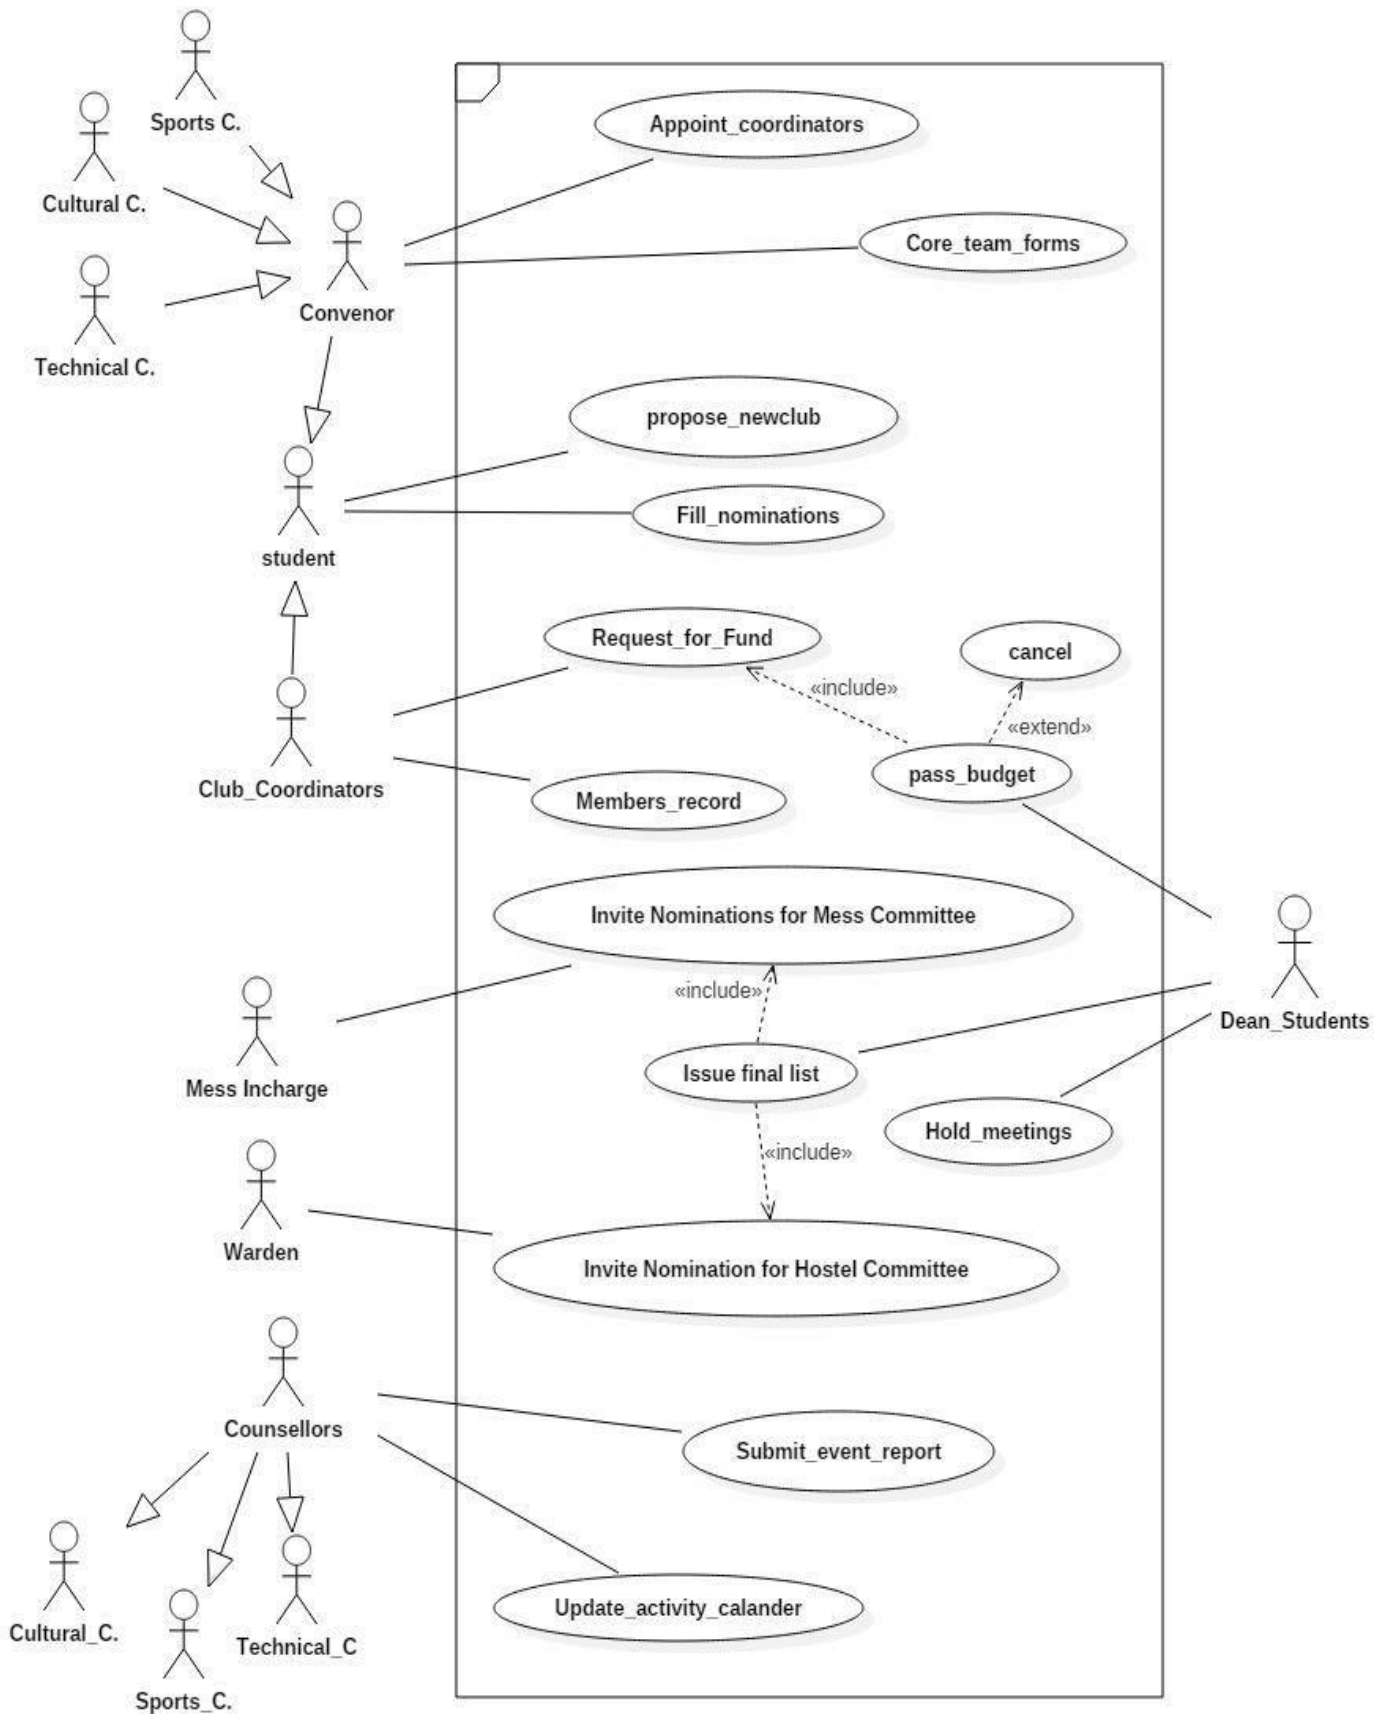

## 2.5 Design and Implementation Constraints

The Software will be designed in English Language only. Native languages are not supported by software itself, although if the underlying platform allows it, there is no objection by the part of software developers.

## **2.6 Assumptions and Dependencies**

It is assumed that the platform on which the software is operating is working correctly, such as Network connectivity, Operating system, as well as Hardware components such as Hard disk, RAM, processor, network interface card, are functioning as per requirements. Also, it is assumed that the required technology to run the software is present in the system.

### 3.0 System Features

## 4.0 Use Cases

|                |  |   |
|----------------|--|---|
| UC ID          | UC#1   |   |
| Use case Name  | new_club   |   |
| Description    | proposal for the formation of new club   |   |
| Actor          | Student  |   |
| Precondition   | club doesn't exists  |   |
|                | 1.   | formation of new clubs to the convenor with proper documentation of funds               |
|                | 2.   | application is forwarded to the Dean (S) through the counsellors for the final approval |
| Post Condition | Club is formed and then coordinators, co-coordinators, and faculty incharge are to be selected . |   |

|                |  |  |
|----------------|--|--|
| UC ID          | UC#2   |  |
| Use case Name  | Members_records  |  |
| Description    | Members list of various clubs is uploaded on the online portal |  |
| Actor          | Club-coordinator and coco                                      |  |
| Precondition   | must be co and coco  |  |
| Main Flow      | 1.   | upload the final list of the registered members in the club. |
| Post Condition | List should be made available to the concerned authorities.    |  |

|                |  |  |
|----------------|--|--|
| UC ID          | UC#3   |  |
| Use case Name  | update_activity_calendar   |  |
| Description    | Shows the event scheduled  |  |
| Actor          | Student  |  |
| Precondition   | All events need to be decided and their dates need to be fixed   |  |
|                | 1.   | co and coco book events  |
|                | 2.   | student views the activity calendar  |
|                | 3.   | receives notification  |
|                | 4.   | Coordinators & co-coordinators can be able to modify event details & delete an event |
| Post Condition | Activities should not clash with each other and other academic affairs or semester examination.                    |  |
| Alternate Flow | if any objection is raised by the Dean (S) against the selected candidates then there is need for reconsideration. |  |

|                |   |   |
|----------------|---|---|
| UC ID          | UC#4  |   |
| Use case Name  | club_membership                                     |   |
| Description    | club registration should be done online             |   |
| Actor          | Students  |   |
| Precondition   | Can apply any time of the year                      |   |
|                | 1.  | fill the form                               |
|                | 2.  | Submit the form                             |
|                | 3.  | updated list of names appears to co or coco |
| Post Condition | Registration fees must be handed over to CO or COCO |   |

|                |  |  |
|----------------|--|--|
| UC ID          | UC#5   |  |
| Use case Name  | session_booking                                  |  |
| Description    | To book session                                  |  |
| Actor          | Co & Coco  |  |
| Precondition   | must be CO & COCO                                |  |
|                | 1.   | session booked by CO and COCO                  |
|                | 2.   | Notification of booked session to all students |
|                | 3.   | CO can update a session                        |
|                | 3.   | CO can cancel a session                        |
| Post Condition | In case of any clash, Session must not be booked |  |
| Alternate Flow | iif any event clashes then it need to be changed |  |

|                |                                |   |
|----------------|--------------------------------|---|
| UC ID          | UC#6                           |   |
| Use case Name  | club_details                   |   |
| Description    | Club detail is being displayed |   |
| Actor          | Students                       |   |
| Precondition   | Club details should be updated |   |
|                | 1.                             | Display information of club                       |
|                | 2.                             | link to page of club website and contact details. |
| Post Condition | year end co & coco change      |   |

|                |  |  |
|----------------|--|--|
| UC ID          | UC#7   |  |
| Use case Name  | Core_team_forms  |  |
| Description    | Convener invites nominations for core team formation   |  |
| Actor          | Convener   |  |
| Precondition   |  |  |
|                | 1.   | Nominations are invited by the convenor  |
|                | 2.   | Students who have applied for the post are invited for the interview, which is conducted by respective counselors. |
|                | 3.   | The selected students list is further sent to the Dean(S)  |
| Post Condition | No objection should be there against the selected student.   |  |
| Alternate Flow | if any objection is raised by the Dean (S) against the selected candidates then there is need for reconsideration. |  |

|                |  |   |
|----------------|--|---|
| UC ID          | UC#8   |   |
| Use case Name  | Fill_nominations   |   |
| Description    | fill the nomination form for election of senate or the committees of Mess and Hostel |   |
| Actor          | Students   |   |
| Precondition   | Respective incharges should notify students about the nomination form and election.  |   |
|                | 1.   | Once the forms are available online for filing nomination, students should login and fill the nomination for the respective post .                            |
|                | 2.   | The nominations are submitted to the respective incharge and an email is sent for approval and confirmation.  |
|                | 3.   | Further respective incharge select the students by conducting election at their level and sends the list of selected students to the dean for final approval. |
|                | 4.   | If dean has no objection then the list is approved but if there is any objection then incharge needs to reconsider.   |
| Post Condition | New committee forms after the whole process.   |   |

|                |  |   |
|----------------|--|---|
| UC ID          | UC#9   |   |
| Use case Name  | Invite_nomination_for _hostel_committee  |   |
| Description    | notification is sent to the students for the formation of new hostel committee   |   |
| Actor          | Warden   |   |
| Precondition   | There should be representative from every batch in the committee   |   |
|                | 1.   | Warden notifies students when there is need to form a new hostel committee. |
|                | 2.   | Forms are made available to the students to fill and apply.                 |
| Post Condition | Students who have applied are for being a part of committee are called and the selection is done internally and the list is forwarded to the Dean(S) |   |
| Alternate Flow | If something went wrong or the Dean have some objection against the selected student then re-elect the member  |   |

|                |   |   |
|----------------|---|---|
| UC ID          | UC#10   |   |
| Use case Name  | submit_event_report   |   |
| Description    | Whenever any event happens of any club or during any fest the final and detailed report is submitted. |   |
| Actor          | CO/COCO, Convenor, Counsellor, Dean(S)  |   |
| Precondition   | The report should contain each and every detail about fund spent, participation, prizes if any.       |   |
|                | 1.  | co-ordinators submit their respective club activities report to the convener.                           |
|                | 2.  | convener then forward it to the counsellor and then it is notified to the Dean(S) for final submission. |
| Post Condition | Report should be accepted by the Dean(S)  |   |
| Alternate Flow | If there is something wrong in the report then it is given back.                                      |   |

|                |  |  |
|----------------|--|--|
| UC ID          | UC#11  |  |
| Use case Name  | notification                                 |  |
| Description    | keeps you updated with recent activities     |  |
| Actor          | Depends on activity (Student)                |  |
| Precondition   | Even to be booked and planned                |  |
|                | 1.   | Keeps you notify regarding upcoming events |
|                | 2.   | notifications regarding cultural meetings  |
| Post Condition | to be removed one event is done or cancelled |  |
| Alternate Flow | If cancelled notification pops up.           |  |

|                |                                |   |
|----------------|--------------------------------|---|
| UC ID          | UC#12                          |   |
| Use case Name  | Voting System                  |   |
| Description    | Club detail is being displayed |   |
| Actor          | Students                       |   |
| Precondition   | Club details should be updated |   |
|                | 1.                             | Display information of club                       |
|                | 2.                             | link to page of club website and contact details. |
| Post Condition | year end co & coco change      |   |

## **5.0 Other Non-Functional Requirements**

### **5.1 Performance Requirements**

The software should be able to run day and night continuously without getting disrupted on its own.

If there is any delay in the connection of the database, Proper Error Message must be displayed.

System must not exit without informing the user.

### **5.2 Safety Requirements**

Information transmission should be securely transmitted to server without any changes in information.

### **5.3 Security Requirements**

The main security concern is for User account (Gymkhana Office Bearers and Administrator) hence proper login mechanism should be used to avoid hacking. The password must be kept in proper encrypted format. The software also send any kind

of data to other machine than the user by itself unless tampered. The systems back-end servers shall only be accessible to authenticated administrators.

#### **5.4 Software Quality Attributes**

The software should be portable so that it can run over multiple platforms. The software should not crash the users machine or the remote server. It sends requests to download web pages. It should not eat excessive bandwidth on network. It should not put extra load on the users machine, making user handle to do any other work. The software should be extensible and should be able to get easily used as a component to larger systems. The software should be maintainable and testable easily. The software should be foremost usable and should work as per the software requirement specifications. The software should be intuitive to use and easy to learn.

## **6.0 Overview of the Document**

The remaining sections of this document provide a general description, including characteristics of the users of this project, the product's hardware, and the functional and data requirements of the product. General description with functional requirements of the project is discussed in section Overall Description of this document. External Interface Requirements gives the Hardware, Software and Communication Interfaces designing the Gymkhana Software. It also gives the user viewpoint of product. System Features also gives the specific requirements of the product. It also discusses about the various use cases included in the Project. Last Section of gives detail about Non Functional requirements.
